

RideSure — Apple Glass (Violet) Design Specification

A complete, unambiguous frontend design reference for the lightweight, frosted glassmorphism interface with a violet color scheme.

1. Design Principles & Guidelines

The RideSure Apple Glass edition leverages modern UI characteristics inspired by Apple's operating system materials. The design prioritizes depth, clarity, and soft organic hues to create a high-trust intercity ride-sharing experience.

- Frosted Glass Materials:** All cards and panel controls use a semi-transparent base overlay with high backdrop saturation and blur. This simulates real glass physical sheets layered over a colorful, fluid mesh background.
- Soft Glare Borders:** Every card features a thin `1px` border using a semi-transparent white layout to simulate natural light reflections on the edges of glass plates.
- High Contrast Typography:** Elegant humanist serifs (Fraunces) for display headers, paired with standard system sans-serif (Inter) for data readability. Body copy uses deep violet-navy to guarantee WCAG AA readability over translucent backdrops.
- Vibrant Accents:** Light violet is reserved as the primary action/active color. Dusty rose represents secondary tags, while clean emerald green denotes verification checkboxes.

2. Color Token System

Token Name	Value	Role / Application	Notes
<code>--color-bg-glass</code>	<code>rgba(255, 255, 255, 0.4)</code>	Frosted overlay	Transparent base sheet layer
<code>--color-surface</code>	<code>rgba(255, 255, 255, 0.65)</code>	Card panel background	Frosted glass card backing
<code>--color-surface-alt</code>	<code>rgba(255, 255, 255, 0.35)</code>	Inner content backing	Nested cards, inputs at rest

Token Name	Value	Role / Application	Notes
--color-border	rgba(255, 255, 255, 0.4)	Glaring borders	Simulates edge light reflections
--color-ink	#241243	Primary text, headings	Deep navy-violet
--color-ink-secondary	#4F3B66	Subheadings, active text	Medium slate-purple
--color-muted	#7D6F93	Captions, timestamps	Muted purple grey
--color-accent	#8B5CF6	Action headers, buttons	Apple violet / purple
--color-accent-tint	rgba(139, 92, 246, 0.12)	Active row highlight	Translucent purple backdrop
--color-clay	#D16279	Clay accents, warning tags	Dusty rose / pastel red
--color-alert	#EF4444	SOS Button, errors	Crimson red
--color-success	#10B981	Verification checkmarks	Forest emerald green

3. Typography & Spacing Scales

Typography Parameters

Role	Font Family	Weight	Size (Desktop)	Size (Mobile)	Line Height
Display / H1	Fraunces (Serif)	600	32px	28px	1.15
H2	Fraunces (Serif)	600	24px	22px	1.2
H3	Fraunces (Serif)	500	20px	18px	1.3
Body Text	System Sans / Inter	400	15px	15px	1.5
Body Strong	System Sans / Inter	600	15px	15px	1.5
Caption	System Sans / Inter	400	12px	12px	1.4

Spacing Scale (8px Base)

All margins, padding values, and panel offsets must conform strictly to: 4px , 8px , 12px , 16px , 24px , 32px , 48px , 64px .

Rounded Corners (Radii)

- **Main Panel Cards & Bottom Sheets:** 20px border radius.
- **Buttons & Text Input Fields:** 14px border radius.
- **Pills & Status Badges:** Fully rounded (999px).
- **User Profile Avatars:** Fully circular (50%).

4. Apple Glass Materials Core CSS

To implement the glass overlay panel effects cleanly in CSS, cards must declare:

```
.glass-material {
  background: rgba(255, 255, 255, 0.65);
  backdrop-filter: blur(28px) saturate(190%);
  -webkit-backdrop-filter: blur(28px) saturate(190%);
  border: 1px solid rgba(255, 255, 255, 0.4);
}
```

```
box-shadow: 0 8px 32px 0 rgba(31, 38, 135, 0.04);  
}
```

5. Signature UI Component: The Trust Petal

The radial, marigold-inspired verification badge contains 5 to 6 petals positioned around a central core. It is overlaid at the top-right of user avatars (overlapping the avatar edge by 25%).

- **Unverified / New State:** Muted border outline only (`rgba(255, 255, 255, 0.4)`).
- **Partially Verified State:** Translucent violet fill with solid violet stroke outline.
- **Fully Verified State:** Solid violet fill with a clean white inner core.
